INTRODUCTION.

The Role of Design in Supporting Neurodiversity at Work

01 | COURSE DIRECTORY.

+ Building Science and Performance
+ Design and Design Services
+ Neurodiversity

02 | CREDIT.

+ 2 LU/HSW

03 | COURSE DESCRIPTION.

+ When designers concentrate solely on the physical layout of a workspace, they often overlook the diverse needs of neurodiverse individuals, leading to environments that may not fully support all employees.
+ This session will introduce neurodiversity in the workplace and the critical role that inclusive design plays in creating supportive environments. Participants will learn about common challenges faced by those who have neurological differences and discover design strategies to create more accommodating and productive workspaces.

04 | LEARNING OBJECTIVES.

+ Understand the challenges that neurodivergent individuals may deal with in the workplace.
+ Understand the significance of providing offices and focus rooms for neurodiverse individuals in thr workplace.
+ Recognize the importance of neurodiversity in design and its impact on organizational success.
+ Learn how accommodating neurodiverse individuals can foster inclusivity, enhance productivity, and promote creativity and innovation.
